Brand Identity Guide

The logo is a key element of our brand that represents it in the digital environment.

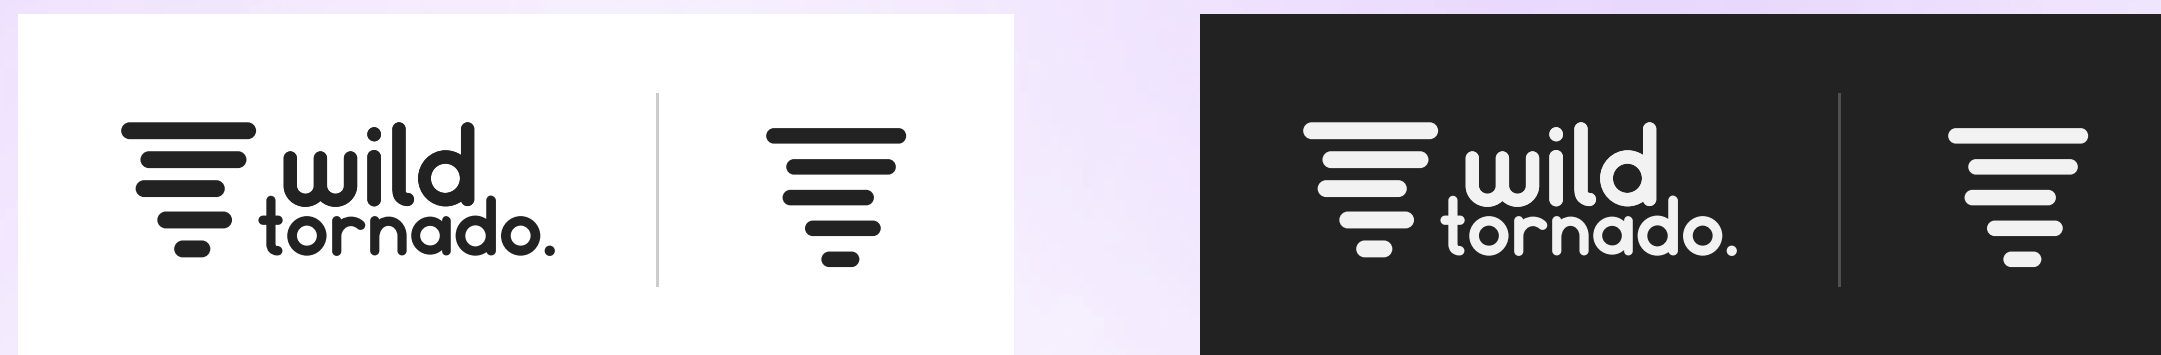

Full & Short version

The area around the logo should have enough empty space between the logo and anything else nearby, like text or pictures. This space should be about 40-45% of the logo's height. Having this space makes sure the logo stands out clearly and is easy to see.

Color usage

To ensure optimal readability and recognizability of the logo, it is necessary to follow background contrast rules. The black logo should be used on light backgrounds, while the white logo should be used on dark backgrounds, creating contrast that guarantees its visibility and clarity.

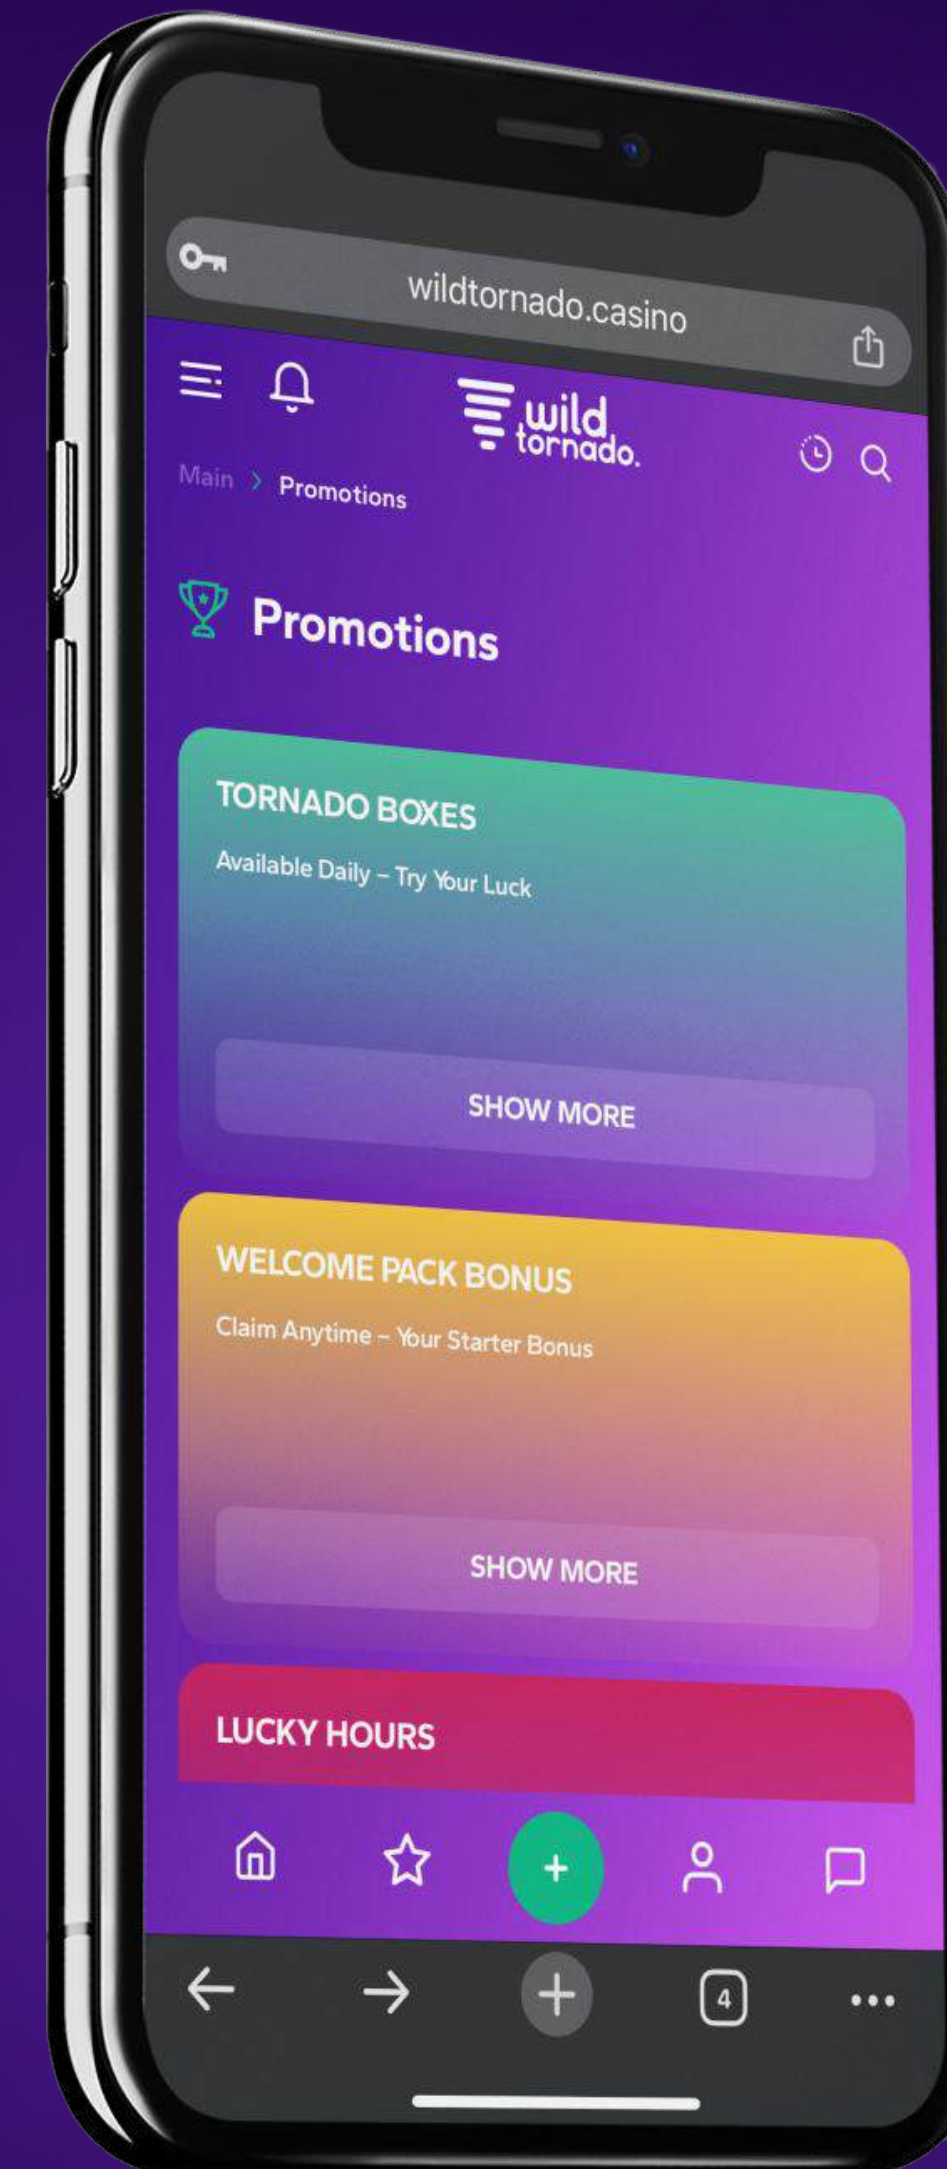

You can find more details in our [Digital Guidelines](#)  or [Download Logotype](#)
